**JVC Expands Xtreme Xplosives Headphone Series  
With Two New Inner Ear Models**

LAS VEGAS, January 10, 2012 – JVC today announced the expansion of its Xtreme Xplosives headphone series with the addition of two new inner ear models. Both new headphones, *the HA-FR201* and *HA-FX101*, offer powerful bass performance, a secure fit and the durability that characterizes the entire Xtreme Xplosives line.

The two new headphones are identical in specifications and performance, with the *HA-FR201 adding an in-line remote control and microphone*. Shared features include JVC's Extreme deep bass port that delivers strong bass reproduction, and a powerful 0.33-inch neodymium driver in each housing for clean, clear sound. Silicone earpieces in three sizes are included to ensure a comfortable and secure fit, and to provide superior sound isolation and minimize sound leakage. Rubber protectors enhance durability, making the headphones ideal for active users.

To these features the *HA-FR201 adds a remote control and microphone compatible with Apple, Blackberry and Android devices*. The cord-mounted single-button control makes it easy to operate play, stop and skip functions, and answer a phone call. A conversion cable for Samsung and Sony-Ericson devices is included.

Both models come in five colors, blue, black, green, red and violet. The headphones come complete with a 3.94-foot (1.2 meters) color cord with a gold-plated iPhone®-compatible slim plug.

The new JVC HA-FX101 and HA-FR201 will be available in March for \$29.99 and \$39.99, respectively.
